

Bruce Ravelli
SLGY. 3331-001

Comments:

- Bruce is an excellent instructor and he motivates the class to learn about an extremely boring topic. He sets us up for success as students.
- Bruce shows great knowledge of course material and is a great instructor. He treats us as individuals more than students.
- Bruce is absolutely wonderful. Incredibly intelligent. He is a very fair marker. The grade always reveals the effort put in. I have never had a better instructor. Nothing needs to be improved.
- Bruce is a wonderful instructor, and makes the learning environment fun.
- Bruce is a really good teacher; sometimes I think there is more in the notes than we really need.
- I think there needs to be more office hours. All of the penalties seem retarded! I think they are excessive. Bruce is an excellent teacher. My favorite class.
- Dr. Ravelli makes the subject matter very interesting. I find his manner of teaching enjoyable and interesting.
- Bruce does a great job of relating class material to the modern day. He also has "quality of mind" which helps him to offer subjective education in all areas.
- The class is excellent, that is all that I can say.
- I find that sometimes the notes can be complicated, and in order to understand you have to read them many times. If a student doesn't understand one word then the whole sentence or notes are very hard to learn from.
- The lectures were worth tuition in itself. They were the type that always had my attention and made me think about the issues at hand. Very friendly and well spoken.
- Bruce has a way of lighting up the classroom with his enthusiasm and insight towards sociology. Even if you've never taken the subject before, one day in his classroom you become immediately connected and enthralled with the course material. He is an awesome instructor and deserves all the respect possible from his students.
- Ability to make dull material into interesting topics of discussion. However, his standards for paper assignments are complex and does not make himself clear when explaining exactly why he grades the way he does.
- Instructor tries to communicate material in a way students can relate to ie. Examples, interpretations, questions etc. Can relate to the fact that the material may not come so easy to students and alters his learning to accommodate students that have difficulty.
- I have spent 3 years at MRC and Bruce Ravelli is the best instructor I have ever had. NEVER has he not given his best to help me with school and his class. He has also taught me a lot about life which is not in the cirrocumuli. Bruce Ravelli is the most enthusiastic instructor I have ever seen or heard about and I will miss his ability to make me want to actually learn instead of "passing a test".
-
